Integrated Care Training Academy

Behavioral health issues such as addiction, anxiety and depression are often thought of as secondary, although they have an impact on health outcomes. That's why it's so important to treat behavioral and physical health together with an integrated care plan. The Integrated Care Training Academy offers a variety of office-based training and education specifically focused on this integrated care model. For more information, visit www.mercycareplan.com/providers/tools-education/academy.
