Family Medicine Training in Silver City

The HMS Family Medicine Residency Program is specifically designed in the “1+2” format to offer top quality training in the urban setting at the University of New Mexico during the intern year, followed by a two-year family medicine residency training experience at Hidalgo Medical Services in the rural communities of southwest New Mexico. This ACGME-accredited program has been specifically tailored to provide unsurpassed expertise in rural and frontier family medicine and is the first program to receive teaching health center designation in New Mexico.

Graduate medical education at Hidalgo Medical Services is conducted to ensure the following successes:

- Provide a critical part of the continuum of educational experiences for students engaged in medical education;
- Assist the State of New Mexico in meeting the statewide need for skilled and competent practicing physicians, as well as attempting to help meet workforce needs regionally and nationally;
- Meet the demands for graduate medical education placed on graduates of the UNM School Of Medicine and other schools of medicine of its caliber;

- Assure that resident education addresses the importance of quality patient care and patient safety;
- Encourage ongoing review of current strategies in education and patient care through research endeavors that include continued collaboration with the University of New Mexico;
- Assure that this family medicine training program provides educational experiences that are sensitive to the unique multicultural environment of

New Mexico, while meeting or exceeding the standards of quality care and professionalism.
